

# Unit 12

## Addition and subtraction

Five daily lessons

National  
**Numeracy Strategy**

Year 4  
Summer term

### Unit Objectives Year 4

- Consolidate understanding of relationship between + and –
- **Use known number facts and place value to add or subtract mentally, including any pair of two-digit whole numbers.**
- **Develop and refine fine written methods for column addition and subtraction of two whole numbers less than 1000.**

Pages 34, 36

Pages 44, 46

Pages 48, 50

This Unit Plan is designed to guide your teaching. You will need to adapt it to meet the needs of your class.

### Resources needed to teach this unit:

- Resource sheet 12.1
- Activity sheet 12.1
- Activity sheet 12.2
- Activity sheet 12.3
- OHT 12.1
- Self-assessment sheet 12.1
- Half-full jar containing approx 120 sweets or small objects; another containing 100.
- Demonstration set of place value cards
- Place value cards (class set)
- Digit cards
- Three large dice
- Whiteboards
- Counters

Year 3

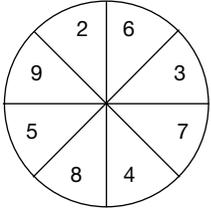

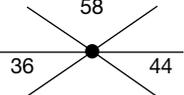

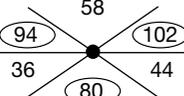

### Link Objectives

Year 5

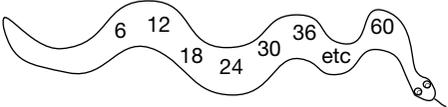

- Extend understanding of the operations of addition and subtraction, read and begin to write the related vocabulary, and continue to recognise that addition can be done in any order.
- Use known number facts and place value to add/subtract mentally.
- Use informal pencil and paper methods to support, record or explain  $HTU \pm TU$ ,  $HTU \pm HTU$ .
- Begin to use column addition and subtraction for  $HTU \pm TU$  where the calculation cannot easily be done mentally.

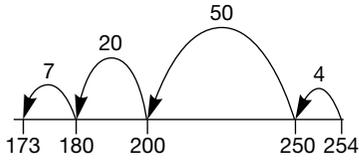

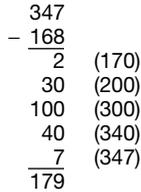

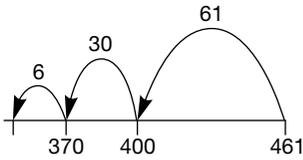

- **Extend written methods to column addition/subtraction of two integers less than 10 000.**
- Use known number facts and place value for mental addition and subtraction.

(Key objectives in bold)

<p>Round any three-digit number to the nearest 10 or 100.</p> <p>Derive quickly all number pairs that total 100.</p> <p>VOCABULARY total number pair</p> <p>RESOURCES Three large dice Resource sheet 12.1</p>	<ul style="list-style-type: none"> <li>Roll three large dice and write the three-digit number generated on the board.</li> <li>Ask questions such as:           <div data-bbox="353 395 741 459" style="border: 1px solid black; padding: 2px; margin: 5px;">Q Add/subtract 10, 100, 1000 and multiples of 10, 100, 1000.</div> <div data-bbox="353 480 741 520" style="border: 1px solid black; padding: 2px; margin: 5px;">Q Round to nearest 10, 100, 1000.</div> </li> <li>Use Resource sheet 12.1 Flip-flop activity: establish that the flip-flop sheet displays 100 digits, ten to each box. Fold the flip-flop so that a point faces towards you, and the other points towards the children.           <div data-bbox="353 703 741 743" style="border: 1px solid black; padding: 2px; margin: 5px;">Q How many can you see?</div> <div data-bbox="353 767 741 807" style="border: 1px solid black; padding: 2px; margin: 5px;">Q How many can I see?</div> <p>e.g. 30, 70; 10, 90</p> <p>Imagine that every time, one finger from my side has moved to your side. Now how many have you got? How many have I got? (31, 69; 11, 89). What if two fingers move to your side?</p> </li> </ul>	<p>Consolidate understanding of relationship between addition and subtraction.</p> <p>VOCABULARY digit units digit 10s digit 100s digit</p> <p>RESOURCES Whiteboards Counters Self-assessment sheet 12.1</p>	<ul style="list-style-type: none"> <li>Discuss outcomes from last night's homework activity.           <div data-bbox="1055 328 1787 368" style="border: 1px solid black; padding: 2px; margin: 5px;">Q Did everyone get the same results?</div> </li> <li>Write the following calculations on the board:           <math display="block">\begin{array}{r} 418 \\ + 25\Box \\ \hline 672 \end{array}</math> <p>Discuss ways of finding the missing digit (4).</p> <div data-bbox="1055 568 1787 608" style="border: 1px solid black; padding: 2px; margin: 5px;">Q What clues were there? (e.g. <math>8 + 4 = 12</math>; <math>54 + 18 = 72</math>; <math>418 + 250 = 668</math>)</div> <div data-bbox="1055 632 1787 671" style="border: 1px solid black; padding: 2px; margin: 5px;">Q Which number facts did you use?</div> <p>Repeat for</p> <math display="block">\begin{array}{r} 253 \\ + 6\Box5 \\ \hline 918 \end{array}</math> <p>or <math>648 - \Box \Box 3 = 135</math></p> </li> <li>If appropriate, provide further examples, discussing clues and ways of finding the answer each time.</li> <li>The children work in pairs. They write two addition calculations (including answers), cover/hide one digit in each with counters and present to their partner who finds the hidden number.</li> <li>Repeat with subtraction examples.</li> <li>If appropriate children could cover two digits.</li> </ul>	<ul style="list-style-type: none"> <li>Present the following as 'sliding box' problems. The children might use whiteboards to show their solutions.           <math display="block">256 - \Box = 200</math> <math display="block">421 + \Box = 622</math> <math display="block">54 + \Box = 70</math> <math display="block">\Box + 93 = 200</math> </li> <li>Ask questions such as:           <div data-bbox="1861 592 2177 632" style="border: 1px solid black; padding: 2px; margin: 5px;">Q How did you work it out?</div> <div data-bbox="1861 655 2177 711" style="border: 1px solid black; padding: 2px; margin: 5px;">Q Did anyone think about it in a different way?</div> </li> </ul> <p>ASSESSMENT – Ask the children to get out Self-assessment sheet 12.1 and allow time for them to complete the second problem and describe their strategies to a partner. Then review and complete their target.</p> <div data-bbox="1832 935 2177 1262" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>By the end of the lesson the children should be able to:</b></p> <ul style="list-style-type: none"> <li>Use mental or written methods to find missing numbers;</li> <li>Understand the relationship between addition and subtraction.</li> </ul> <p>(Refer to supplement of examples, section 6, pages 34, 36.)</p> </div>

72	54	76	34
26	62	91	19
23	30	89	74
46	57	59	84

You are going to use these digits:

**1, 2, 3, 4, 5, 6**

- Arrange them any way you like to make an addition sum (HTU + HTU). What is the **total**?
- Rearrange them to make a subtraction (HTU – HTU). What is the **difference**?
- Try different arrangements (HTU + HTU). Which arrangement will make the **largest total**?
- Try different arrangements (HTU – HTU). Which arrangement will make the **smallest difference**?
- If you could use any six digits, which would you choose so as to make the biggest gap between the **largest total** and the **smallest difference**?
